

# WHAT IF...

What if we could create a kinder, gentler, happier world?

What if you loved waking up every morning?

What if there was nothing wrong with you?

What if you're not nearly as screwed up as you thought  
you were?

What if you're far greater than you thought you were?

What if it's time to know your greatness, the gift you are,  
and the contribution you are?

# WHAT IF...

What if gratitude trumps judgment—every time?

What if your kindness healed the world?

What if the Earth is asking for your help?

What if you had the resources to give it?

What if the world doesn't function the  
way we've been told?

What if we can change limitation?

What if weird were the coolest thing you could be?

# WHAT IF...

What if the world was not flat?

What if a disease is not a punishment from God? (What if some of them are actually caused by miniature organisms that are too small to see with our eyes?)

What if you really do change molecules by your interaction with them?

What if the change you've been looking for is right before your eyes?

What if the idea that you can change your life without suffering through it, isn't any weirder than the idea that a man with a beard created the world in six days and rested on the seventh?

What if the uncomfortableness that comes with a difference could be fun?

What if the closed-minded people of the world no longer determined our world?

WHAT IF...

...IT'S TIME FOR A DIFFERENT  
REALITY?

WHAT IF YOU'RE HERE TO  
HELP CREATE IT?

WHAT IF  
NOW'S THE TIME?
